CIBES LIFT PRODUCT GUIDE – Platform and cabin lifts
Lift solutions for accesibility in private, public and commercial buildings

The space saving footprint and 360 degree panoramic glazing of the lift shaft make Cibes lifts fit in any building. With a lifetime of at least 25 years and Energy Label A, Cibes lifts are the most cost efficient on the market. We keep technology simple so that the lift only requires very limited maintenance.

Cibes cabin lifts combines the advantages of platform lift technology with the comfort of a fully enclosed cabin. Lift operation is automatic and virtually soundless. The LED lit ceiling, control panel and inset mirrors exude timeless elegance.

If you buy a cabin lift from Cibes Lift, you get a high-quality product with the same sense of luxury and comfort as a conventional lift, but at a fraction of the cost. Cibes Lift provides smart, prefabricated cabin lifts that are fast and easy to install without major construction work. The perfect choice for any building.

Mix and match with colors

Cibes lifts contribute to your interior design by creating exciting contrasts between different colors and materials. We have created our own exclusive color collection, but you can also choose any other RAL color you like.

Floor collection

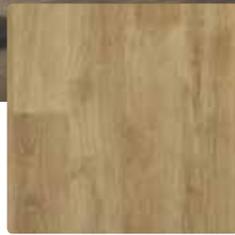

The lift floor is delivered in dark grey, anti-slip PVC as standard, but we have a wide range of options in different styles. Choose one of our wood, stone or aluminium styles, or customize your own floor with laminate or tiles.

Bright and open look

All platform lifts from Cibes include a ready-made lift shaft of steel panels. The shaft can also be delivered in clear or tinted safety glass. The shaft of our platform lifts can be glazed on all sides for a 360 degree panoramic view, which is quite unique.

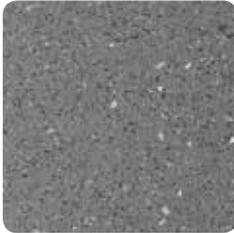

A fully glazed lift shaft looks spectacular but also makes the most of the light. The lift shaft is complimented by doors with panoramic glazing.

Stone – Surestep – A design similar to stone

Wood – Surestep – Emulates natural wood

Safestep – For demanding environments

A smart lift concept

Cibes Lift has created one of the smartest lift solutions in the world. Our lifts adapt to your home, not the other way around.

All lifts from Cibes are delivered with everything you need, including doors and, for most models, even a ready-made lift shaft in steel or glass. To personalize your lift, you have a great choice of different door models, colors and finishes. The price of your lift will depend on the choice of configuration and lift options.

Shaft in steel or glass

Alternatives for your comfort

Level indicator
4" display and voice announcement

Mirror glass
Let the light in with glass, tinted or mirror

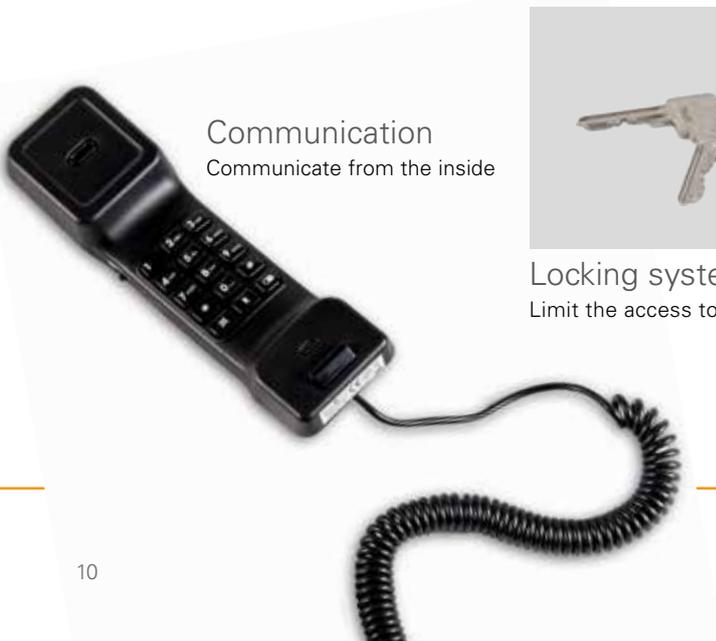

LED light
Lights with long range and brightness

Shaft panels
Choose between steel or glass

Call buttons
Call buttons on the door or remote

Communication
Communicate from the inside

Locking systems
Limit the access to your lift

Door alternatives
In steel, aluminium or fire rated

Good value for money

Cibes lift solutions are prefabricated and so ingeniously constructed that hardly any structural adaptation is necessary. This means that installing a lift from Cibes is fast and easy.

The maintenance cost is affordable, compared to conventional lifts and we recommend that you sign a service contract with your Cibes dealer. That way you know that your lift is always in good condition so that you and your family can enjoy it for many years to come!

We follow you step by step on the way to an installed lift

Help and support

We will follow you every step of the way from order to installation.

The 1-2-3 system:

Step 1: You will get personal advice for your specific situation.

Step 2: Fast delivery and installation by your certified Cibes dealer.

Step 3: Service provided by your certified Cibes dealer.

Quality installation

Your Cibes dealer can visit the installation site in order to find the best lift solution for you. The lift is custom-made, so you can rest assured that it will fit.

You do not need to make any major structural alterations. Your lift can be installed in as little as 2-3 days and then you have a lift that you can enjoy for many years.

Service

Our screw-driven technology is simple and robust and our lifts are low-maintenance. Nevertheless, it is important to keep your lift in good order. Therefore, we always recommend that you sign a service contract with your Cibes dealer. Cibes lifts are equipped with battery emergency lowering, which allows you to lower and evacuate the lift, in case of a power failure.

Day 1 – Installation

First day – The bottom frame, guides and platform are installed. Your platform lift can be installed with or without a lift pit.

Day 2 – Installation

Second day – The doors, shaft and platform cladding are installed, all electrics are plug & play and easy to connect.

Day 3 – Installation

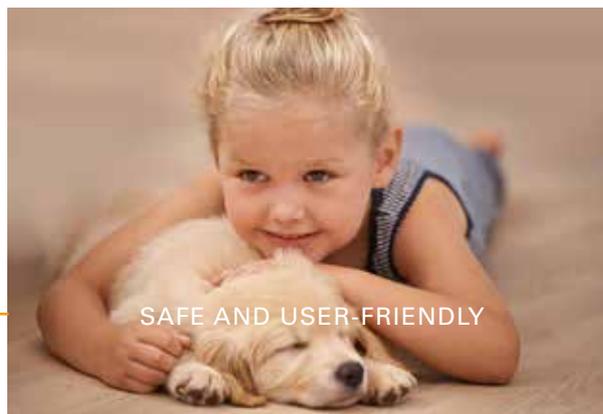

Third day – The finishing touches are applied and all functions of the lift are tested. Your lift is now ready to use.

Safety and quality

Installation and service are key to lift safety. This is why all certified Cibes dealers are trained to install and maintain our lifts. The number of service visits per year depends on the frequency of use, but a lift from Cibes always requires less maintenance than a conventional lift.

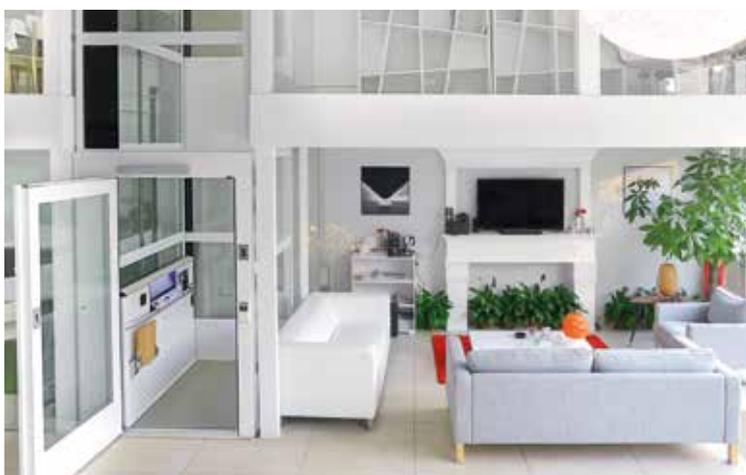

Made in Sweden

Cibes Lift is a world-leading manufacturer of screwdriven platform and cabin lift solutions for private and public settings. Our head office, factory and R&D department are located in Sweden, a country known for its smart, high-quality products and environmental awareness.

Certified quality

All lifts from Cibes Lift are CE marked and comply with EU safety and accessibility standards. Your Cibes lift is a safe product, as long as you follow the instructions in our user manual.

Perfect lift solutions for all kind of interior design

A lift provides accessibility and comfort and can be made into a beautiful architectural feature. Consequently, a lift will increase the value of your property and a lift from Cibes is a smart choice.
